

# 45

YEARS OF RELIABILITY  
SINCE 1975.

## BI-DIRECTIONAL PIG / DISC PIG / BIDI PIG

Pig is an equipment to clean pipeline. The outer edge of pig is elastically sealed to the inner wall of pipeline. Using gas, liquid or pipeline transport medium as the power source, the pig in the pipeline is pushed forward to the end of pipeline or the pig receiver.

Can be moved easily in both directions.

It is meant & designed to clean a newly erected pipeline before commission.

It is specially designed to travel to a max distance without losing sealing with an eye on safety of the newly laid pipeline.

The pigs can easily negotiate travel pipes of different diameters without losing their sealing ability.

The discs of the pigs are designed to ensure sealing ability throughout its running length in both directions.

We offer BIDI pigs of sizes varying from 3" – 72" of different pipe schedule.

Various types of Pigs are

- 1) Bidi Pigs with Brush
- 2) Bidi Magnetic Pig
- 3) Bidi Gauge Pig
- 4) Bidi Dual Module Pig

### HEAD OFFICE :

C-16, Anand Bhuvan, 163/165, V. P. Road, Mumbai - 400 004.

Maharashtra, India.

Phone : +91 22 43431313 (25 Lines)

---

### CORPORATE OFFICE :

29-B, Nakoda Bhavan, Sindhi Lane, Mumbai - 400 004.

Fax : +91 22 23859458
